The Indian Space Research Organisation (ISRO) has a vibrant Earth Observation (EO) programme with many satellite missions launched during past 40 years. The Indian Remote Sensing Satellite (IRS) series of satellites provide space based information for monitoring and management of natural resources and Disaster Management Support under the aegis of National Natural Resource Management System (NNRMS). The Indian Institute of Remote Sensing (IIRS) is a premier Institute of ISRO which is engaged in training, education and capacity building on use of geospatial technology for natural resources monitoring and disaster management since last five decades. The institute has so far conducted 17 Satellite/ Internet based Outreach Programmes, benefitting more than 30,500 participants from around 390 Indian universities/institutions/user departments/user ministries in India. We have now the pleasure of announcing the eighteenth IIRS Outreach Programme on "Basics of Remote Sensing, GIS & GNSS" commencing from August 22, 2016 to further enhance the knowledge of Remote Sensing, GIS & GNSS.
