Study tour report

B.Sc.III 2021-22

Department of Botany organized a field visit for B.Sc. III students as a part of curriculum at Koyanagar Gureghar on 11.05.2022 In this 16 students and 2 teachers are involved

The objectives of the field visit

1. To understand natural phenomenon, manipulation of nature and environment in the benefit of human beings.
2. To study different life forms of plants in the nature.
3. To make the students aware of natural resources and environment.

That place is biologically very important as a part of Western Ghats. First we visited to Platue observed the different plants few of them they are rare endangered and critical, some of them medicinally useful, some of them they are exotics.

Later on we visited to Guhgar. How natural resources use sustainably. Then we visit to sea shore to observe different aquatic marine life forms.

Outcomes

1. Students achieve the knowledge about the different plants found in these localities.
2. Students make the list of plants found in these localities, note important unique feature of plants and their medicinal uses.
3. Students achieve the knowledge of sustainable agriculture.

After visiting these two localities we safely return to Aundh.

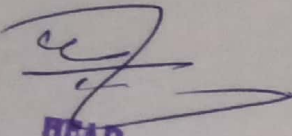

Please accept the same.

Thanking you.
